PROFILE SUMMARY

Full Stack Developer with **4+ years** of experience building and deploying production web applications using **React**, **Next.js**, **Node.js**, and **Express**. Experienced in designing REST APIs, authentication systems, and databases such as PostgreSQL, MySQL, and MongoDB. Skilled in CI/CD pipelines, **Docker**, and **Kubernetes**, with deployments on AWS, Azure, and Vercel. Delivered an **AI-integrated ERP system** for a construction company, along with AI-powered SEO tools, automation platforms, and real-time dashboards. Focused on clean, maintainable code and fast, reliable user experiences.

EDUCATION

Course/Examination	Institution	Duration
BSC Computer Science	University of Calicut	2021

SKILLS

- **Frontend Development:** React.js, Next.js, React Native, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Material UI, Redux, Context API.
- **Backend Development:** Node.js, Express.js, RESTful APIs, JWT Authentication & Authorization.
- **Database & Storage:** MongoDB, Mongoose, MySQL, PostgreSQL, Firebase, Data Modeling.
- **UI/UX & Design Tools:** Figma, Canva, UI Design, UX Design
- **API & Testing Tools:** Postman, Jest, React Testing Library, RESTful API Testing, Debugging, Code Review
- **Deployment, DevOps:** Docker, Kubernetes, CI/CD, AWS , Microsoft Azure, Vercel, Netlify, Render.
- **Integrations:** AI Integration, DocuSign, SendGrid, Wialon, ZKTeco BioTime , Google Maps API, Payment Gateways, PDF Generation, FCM.
- **Tools and Practices:** VS Code, WebStorm, Jira, Agile, Scrum

WORK EXPERIENCE

Full Stack Developer | KEA Building Contracting LLC | UAE | May 2026 - Present

- Develop and maintain an AI-integrated ERP system covering HR, Payroll, Attendance, Assets, Fleet, Project Management, Document Control and HSE.
- Deliver end-to-end features across frontend, backend and database layers using Next.js, React, Node.js, Express, Prisma and PostgreSQL.
- Built secure Client and Consultant Portals, enabling external stakeholders to access relevant project information and workflows.
- Rebuilt the Consultant workflow end to end, implementing document reviews, approval processes, response deadlines and role-based access control (RBAC).
- Implemented an Offer Letter module featuring dynamic PDF generation, DocuSign e-signatures and configurable contract clauses.
- Designed and integrated REST APIs and database schemas to support ERP functionality and business workflows.
- Led multilingual implementation across English, Arabic, Hindi and Urdu, including right-to-left (RTL) interface support.
- Remediated critical and high-risk security issues and migrated application secrets to AWS Systems Manager Parameter Store.
- Collaborated with cross-functional team members to develop, test, debug and deliver ERP features across multiple modules, ensuring smooth frontend and backend integration.

Full Stack Developer | The Camp Solutions | UAE | Jan 2024 - Mar 2026

- Developed custom websites and web applications using MERN stack tailored to client requirements.
- Built cross-platform mobile applications with React Native, delivering responsive apps for both Android and iOS.
- Designed dynamic and responsive front-end interfaces using React.js, Tailwind CSS, and Material UI, enhancing user experience.
- Created and deployed RESTful APIs and integrated third-party services including social media and payment platforms.
- Implemented CI/CD pipelines, automated testing, and SEO optimization, ensuring secure, high-performing web and mobile solutions.
- Managed projects using Git/GitHub, deployed applications on AWS, Hostinger, Render, and Netlify, and delivered solutions fully aligned with client specifications.

MERN Stack Developer | Learnbuds | India | Sep 2022 - Oct 2023

- Developed responsive and user-friendly front-end interfaces using React.js, enhancing usability across devices.
- Created backend APIs with Express.js and Node.js to enable seamless communication and secure data exchange.
- Collaborated with a team of 10 developers to deliver a scalable and optimized MERN stack application.
- Debugged, tested, and deployed applications using modern tools while adhering to industry standards.

- Contributed to code reviews, brainstorming, and agile sprints, improving workflows and technical solutions.

Internship | Livewire | India | Feb 2022 - Aug 2022
- Managed APIs with Express.js to enable seamless data integration and back-end operations.
- Developed a responsive front-end for a live project using React.js, enhancing user experience.
- Implemented and tested CRUD operations, gaining hands-on experience in full-stack development

PROJECTS

AI-Integrated Real Estate Website
- Developed a full-stack real estate platform with property listings, search, and filtering features for seamless user experience.
- Integrated an AI recommendation system to suggest properties based on user behavior, preferences, and past interactions
- Implemented an AI chatbot to provide instant property assistance, user guidance, and automated query handling within the platform.
- Built an admin dashboard to manage properties, users, listings, blogs, and client reviews efficiently.
- Developed RESTful APIs for handling property data, user authentication, chatbot interactions, and admin functionalities.
- Designed a responsive UI with secure authentication and role-based access control for users, agents, and admins.

Doctor Appointment System
- Built a full-stack doctor appointment booking system with a responsive, mobile-first UI using React.js and Tailwind CSS.
- Developed a separate Admin Panel for doctors and administrators to manage appointments, schedules, and patient records efficiently.
- Integrated a secure online payment gateway for smooth and reliable appointment booking and transaction processing.
- Implemented role-based authentication and authorization for patients, doctors, and admins to ensure secure access control.
- Managed deployment on Netlify and maintained version control using GitHub for collaboration and updates.
  GitHub: *Doctor Appointment Website Repository*

AI SEO Analyzer & Rank Tracking Tool
- Developed a full-stack AI-powered SEO platform for website analysis, keyword ranking, and performance tracking.
- Built AI-based SEO report generation system using Gemini AI for automated insights and recommendations.
- Implemented browser automation and web scraping using Browserbase to collect real-time website data.
- Designed and developed responsive frontend using React.js with secure authentication and user management.
- Created scalable backend APIs using Node.js and Express.js for SEO analysis, ranking, and reporting features.
- Integrated MongoDB for storing user data, keyword rankings, and SEO history with optimized database structure.
- Built RESTful APIs and ensured smooth integration between frontend, backend, and AI services with deployment support.

AI-Powered Social Media Automation Platform
- Built and deployed a full-stack AI-powered platform enabling users to centrally manage and automate multiple social media accounts from a single dashboard.
- Engineered an advanced post scheduling system allowing users to plan, queue, and publish content across multiple platforms with time-based automation.
- Integrated AI-driven content generation to create high-quality, engaging, and platform-optimized social media posts in seconds.
- Implemented secure authentication and role-based user management using JWT, ensuring safe and scalable multi-user access. .
- Designed a responsive, modern admin dashboard with a seamless user experience across desktop and mobile devices.
- Developed scalable RESTful APIs using Node.js, Express.js, and MongoDB, ensuring efficient data flow and system performance.
- Integrated third-party automation services (Zernio API) to enable multi-platform publishing and synchronization.
- Leveraged OpenAI API and CodeRabbit to enhance content intelligence and improve code quality through AI-assisted review and debugging.

Real Estate Mobile App
- Developed a cross-platform mobile app for property listings, search, filtering, and interactive map view.
- Implemented RESTful APIs for real-time property data and user management.
- Designed a responsive and intuitive interface optimized for Android and iOS devices.
- Enabled secure authentication and user profile management to track favorites, saved searches, and property inquiries.

CERTIFICATIONS

- **3-Month Internship Certification in MERN Stack** | Feb 2022 - Aug 2022
- **Certified MEAN Stack Development** | June 2021- January 2022
